Adhesive Free Installation to Facilitate Flooring Reuse

Burmatex® achieves circular installation with IOBAC

Adhesive free installation with IOBAC allows carpet tiles to be held securely in place, yet are uplifted cleanly and damage-free, enabling easier reuse and recycling.

Magnetic and dry-tack

IOBAC MagTabs®

Magnetic on one side and dry-tack on the other, IOBAC MagTabs work by locking carpet tiles tightly together using a unique 2-dimensional grip onto magnetically receptive sub-floors such as access flooring.

Double-sided adhesive

IOBAC Tab-It®

Double-sided dry-tack adhesive tabs for cleanly fixing and uplifting carpet tiles on most prepared sub-floors.

Design for Deconstruction

To enable future reuse, repurposing, or recycling

The Construction industry is currently in transition from a linear path to a circular economy, but this process is still at an early stage. Design Deconstruction plays a vital role in a buildings' circularity and a considered approach in selective dismantlement of building components for provision of its future reuse, repurposing or indeed recycling, is imperative in this change.

Supportive measures:

- Products supported by specific, full LCA EPD's
- Products with low GWP
- Products that are Carbon Neutral*
- Products with high recycled content ISO 14021
- Products with recyclable components
- Products compatible with reuse and circular installation

The different colours show different building materials that can be deconstructed and treated separately.

IOBAC MagTabs® and Tab-It® enable carpet tiles to be uplifted cleanly and damage-free, enabling easier reuse and recycling.
