# Carpet Care

## Our carpets

Designed and manufactured in the UK, our carpets are inherently low maintenance. The fibres we use are resistant to stains and moth damage, so there's no need to treat with additional chemicals. We also use a UV stabiliser, which protects your carpet from sun damage.

## There are some simple steps to getting the most from your Furlong Flooring carpet:

**Vacuum regularly** – this helps to remove dirt from the carpet pile, keeping it fresh and clean.

**Clean spills straight away** – this is better for your carpet and helps to remove any stains quickly.

**Protect high-traffic areas** – you might choose to put a mat down at the front door, for example. This helps to protect the carpet in that area and prevents dirt being carried through the house.

**Consider professional cleaning** – regular professional cleaning is really kind to your carpet. It removes deeper dirt and stains and brings your carpet back to life.

# TOP TIPS

Always use a clean, white cloth, kitchen roll or tissue

If in any doubt about treatment, consult a professional carpet cleaner

Move fast! The sooner you tackle a spill, the better your chance of avoiding a stain

Always work from the outside towards the inside to avoid spreading the stain

Do not rub too vigorously

Brush up the pile to help the carpet retain its appearance as it dries out
